ROYAL PACIFIC RESORT AT UNIVERSAL  
DECEMBER 5-9

# Configuring SMB pull server

- SMB pull server is the simplest to configure
- Create and configure an SMB Share (New-SMBShare)
- Configure the clients LCM

# Configuring HTTP pull server

- Need resource module  
xPSDesiredStateConfiguration
- How do you get it?
- Where do you put it?
- Use module to create an HTTP pull server configuration
- Configure the clients for HTTP pull server

# Configuring HTTPS pull server

- Need resource module  
xPSDesiredStateConfiguration
- Need a certificate and its thumbprint
- Use module to create an HTTPS pull server configuration
- Configure the clients for HTTPS pull server
